Topic 1

Title 1

Subtitle 1

This is a paragraph.

- Add more content here
- Or here

Example LaTeX Stuff

$$(a+b)^n = \sum_{i=0}^n \binom{n}{i} a^{n-i} b^i$$

Debugging OCaml

Different ways to debug OCaml

1. Enter into the `root`-directory of the project and run `dune build` to initialize the project.
2. Open `utop` via `dune utop`
3. Load the file you want to debug via the `#use` command (e.g `#use "src/main.ml";;`)
 - All the content of the file will be loaded into the `utop`-environment
 - Variables and functions are now available in the `utop`-environment
 - To reload the file, use `#use "src/main.ml";;` again
