# Topic 1

### Title 1

### Subtitle 1

This is a paragraph.

- Add more content here
- Or here

## Example LaTeX Stuff

$$(a+b)^n = \sum_{i=0}^n \binom{n}{i} a^{n-i} b^i$$

# Debugging OCaml

### Different ways to debug OCaml

- 1. Enter into the root-directory of the project and run dune build to initalize the project.
- 2. Open utop via dune utop
- 3. Load the file you want to debug via the #use command (e.g #use "src/main.ml";;)
  - All the content of the file will be loaded into the utop-environment
  - Variables and functions are now available in the utop-environment
  - To reload the file, use #use "src/main.ml";; again
